		C.S.

Notes:-
 -W.S. indicates wash sample taken at this point.
 -C.S. indicates core sample taken at this point.
 Elevation of Ground Water +2:0"
 The sand and sand and gravel from Elev. +3:0" approx. to the clay is all clean hard sand and very compact in all three borings.
 About 6' of good tough clay was encountered in all three borings immediately below the sand.
 No soft or "swelling" clay was encountered in these borings
 Numerous sand pockets were encountered in the clay below Elev. -22.
